

TANGIE

STRAIN CLASSIFICATION

Sativa dominant

KNOWN TO ALLEVIATE

- Depression
- Nausea
- Appetite loss

TERPENE PROFILE

- Myrcene
- Caryophyllene
- Pinene

DESCRIPTION

Tangie is a sativa hybrid created by combining California Orange and Skunk #1. A popular choice in Amsterdam, this strain pays tribute to Tangerine Dream that was widely sought after in the 1990s. The citrus heritage of Tangie is most evident in its refreshing tangerine aroma, with sweet and sour notes. Tangie has a strong, sweet flavor profile reminiscent of tangerines and other citrus fruit.
